CAS-6245-22-5G

Super Premium Semi-Synthetic Vacuum Pump Fluid

CAS-6245-22-5G is recommended for use in use in vacuum pumps. It utilizes an advanced-technology blend to provide a fluid that is chemically and thermally stable. CAS-6245-22-5G offers low vapor pressure, excellent rust and corrosion protection, and very good resistance to oxidation and sludge formation

ATTRIBUTES

- Low vapor pressure
- Thermal and chemical stability
- Good oxidative stability
- Carbon, varnish, wear, rust and corrosion control
- High flash point
- Low volatility
- Excellent film strength

TYPICAL LUBRICANT PROPERTIES

CAS-6245-22-5G Grades	22	68	100	150
Viscosity @ 40°C	21	67	98	150
Viscosity @ 100°C	4.2	8.9	11.6	15.5
Flash Point °F	399	441	503	505
Rust Test	Pass	Pass	Pass	Pass
Copper Corrosion	1a	1a	1a	1a
Demulsibility	40/40/0	40/40/0	40/40/0	40/40/0
